

Automatic Cup sealing machine

Introduction:

This machine is the cup sealing machine. It can be applied to plastic or paper cups from heat sealing system, automatic membrane cutting and waste membrane recovery, delivery the sealed cups out. This machine is suitable for the big cups or unshaped cups.

Working process:

1. The user need to fill the product manually into the cup
2. Put the cup on the station of the machine manually
3. The machine will seal the cups automatically
4. The finished cups will be delivery out.

Technical Parameter:

Model	GCCS-800
Packing Speed	800-900 cups/hour
Voltage	220V/380V
Machine Power	1.1KW
Heat Power	4.5KW
Filling Range	According to cup volume
Air source	0.5MPa-0.75 MPa
Dimension	120*120*180 cm
Machine Weight	About 380kg
