Automatic Double Side Labeling machine

Technical Parameter:

Voltage	220V/50hz
Power	1600W
Length	20-250mm
Width	30-90mm
Height	60-280mm
Label Precision	1.0mm
Label speed	50-200pcs/min
Weight	330KG
Dimension	290*145*150cm

Illustration	Description
	Adopting the Imported PLC and Touch Screen Reducing the complexity of the circuit, control and Electrical failure rate.
	Servo motor Accurate positioning and transmission with step motor, accurate labeling and low error
	Bottle top conveyor The conveyor will be delivered and hold the bottle top to keep the running with the main conveyor simultaneously in order to insure the accurate labeling. Can adjust the height easily to fit for different height bottle.
	High quality transmission structure With enhanced motor to make sure good transmission
