

Automatic Cartoning Machine

Description:

This machine is the automatic carton shaping and opening machine. It is with processed with automatic feeding carton, open carton, folding undercover and taping carton and delivery of the cardboard box. This machine is controlled by P.L.C + display screen. It is very convenient to operate, reduce production personnel and labor intensity. It is an essential equipment for automatic production of scale. It is easy to operate and reduce the cost of packing.

Features:

1. High and new technology:

With more than ten years of experience in developing and designing the box opening machine, we have introduced advanced technology in Japan and Germany.

2.Excellent quality:

The machine is stable and reliable, and has high quality in the world. Through aging test, parts are ensured to be more stable.

3.Easy to operate:

It is suitable for opening cartons with various sizes. If you want to change the specifications of cartons, manual adjustment can be made

4. Security performance:

1. The mechanical properties are precise and durable, the structural design is rigorous, the operation process is free of vibration, and the operation is stable and reliable.

2. Install blade protection device to avoid accidental stab in operation.

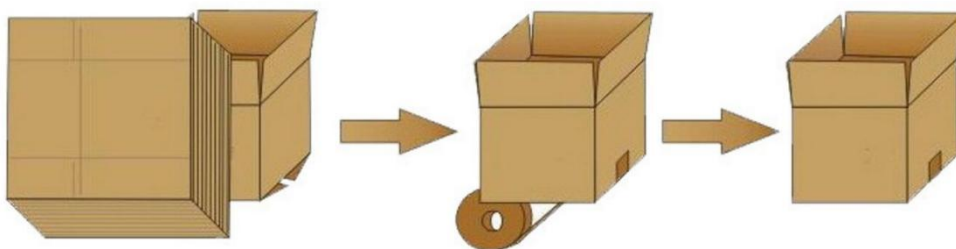

3. Install protective cover to make production safer and more efficient packaging.

Technical parameter:

Speed	8-12 cartons/min
Voltage:	220V
Power	200W
Carton Size:	L:200-450 W:150-400 H:100-350mm
Storage of cartons:	100pcs(1000mm)
Tape Size:	48-75mm
Air consumption:	450NL/min
Machine Dimension:	L2000×W1900×H1450mm
Weight:	400kg

Working process:

Feeding→cardboard→fold carton→tape carton→Deliver

Quotation				
Item No	Description	Quantity	Unit Price	Total Amount
	Automatic cartoning machine	1	450,000.-	450,000.-
Remark	PLC with simens SF-120
