

Automatic Grass bottle capping machine

Description:

Glass Jars metal capping closing machine is suitable for all kinds of glass bottle caps, through the cylinder pneumatic principle to adjust the rotation torque, torque adjustment through the cylinder stroke adjustment, so that the rotating cover to achieve the perfect effect capping.

Features:

- 1.Beautiful appearance and compact structure
- 2.Even cap closing with good sealing performance
- 3.Accurate cap positioning without abrasion of the surface
- 4.Pneumatic control is adopted. Convenient operation and maintenance.

Technical parameter:

Voltage	220V 50Hz
Air supply	0.4-0.6Mpa
Cap diameter	Φ20--Φ 80mm(can customized)
Cap height	10-30mm
Capping speed	10-30bottles/min (can customized)
Bottle diameter	Φ35-Φ130mm
Bottle height	40-160mm(can customized)
Dimension	2000*1000*1700mm
