

Medicine Tablet Counting Machine

This machine is mainly used for quantitative packing of capsules, tablets and soft capsule honey pills. It is suitable for small and medium-sized batch production in manufacturing factories, health products factories, scientific research institutes and laboratories. It can also be widely used for counting, bottling and bagging of regularly shaped items such as steel beads.

2. Small granulator is small in size, light in weight, low in noise, accurate in counting, simple in operation and simple in maintenance.
3. The contact parts of drugs are made of stainless steel, which ensures the cleanliness of the packaging and meets the requirements of GMP.
4. It is an ideal special equipment for counting, bottling and bagging capsules, tablets, granules and other medicines or foods.
5. This machine is the smallest, advanced, beautiful and economical counting and bottling equipment in the counting machinery in China.
6. Distinctive vibration design: less noise (only 20 decibels in a few hours) and better vibration effect.
7. Bottling speed is faster, up to 36 bottles per minute.
8. High gloss count holes, more beautiful, faster feeding, better accuracy.
9. Use 304 stainless steel, including hopper, hopper bottom plate are 304 stainless steel material, the whole machine design is more beautiful.

Technical parameter:

Model	SP100-2
Voltage	220V/80W
Counting range:	1-100 tablets/can (00# capsules) 1-120 tablets/can (0# capsules) 1-150 tablets/can (1# capsules) 0-500 tablets/can (Diameter 12mm, thickness 5mm)
Dimension	420×420×760mm
Weight	45KG
