

# CY-07 Ultrasonic Tube Sealing Machine

## ➤ Main Feature

Applicable to: sealing of various plastic tubes in food, medicine, cosmetics, chemical and other industries.

## Machine Structure

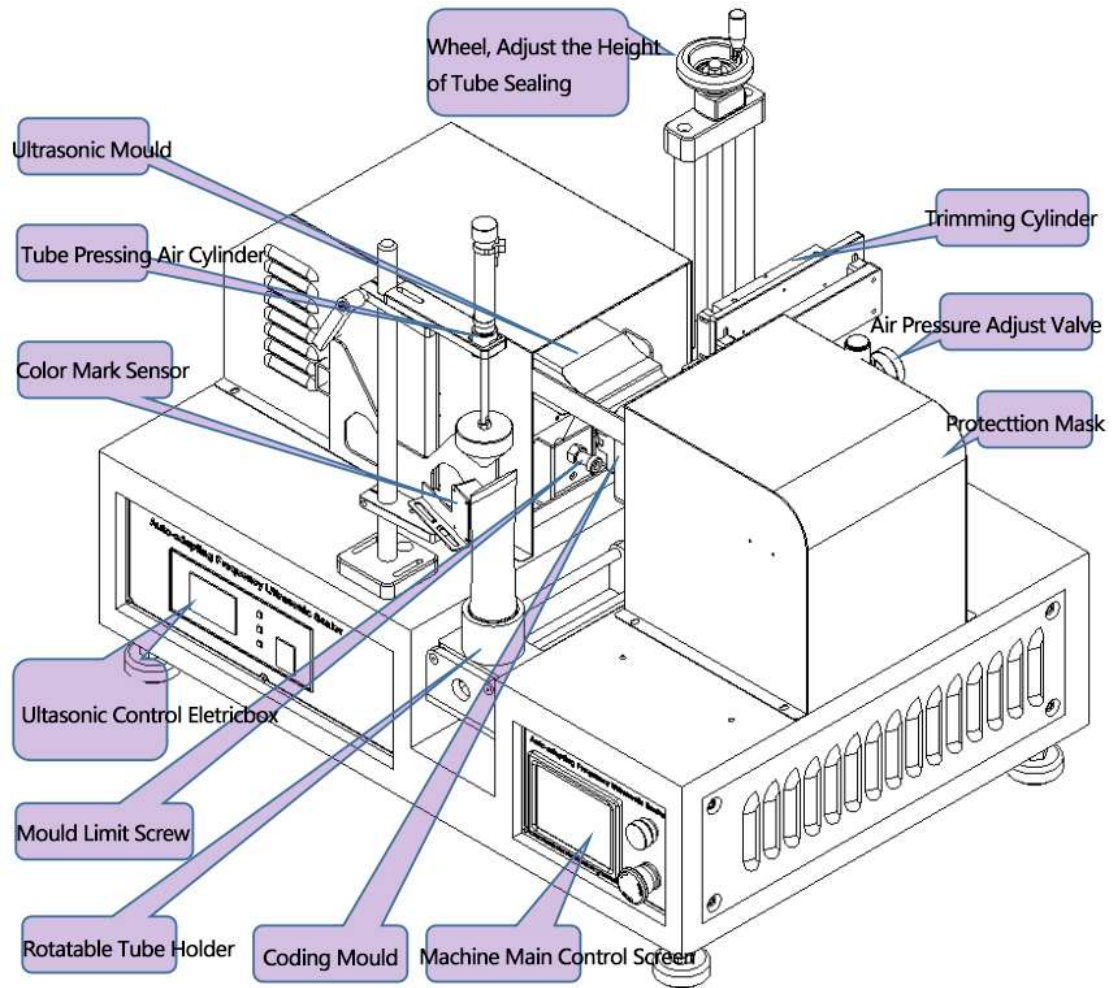

### ➤ Front View

CY-07 ultrasonic hose sealing machine is a high-quality and high-performance hose sealing and packaging machine. It adopts manual tube loading, automatic color mark detection, automatic tail sealing, and automatic tail cutting. It adopts PLC control and touch HMI.

The operation of this equipment is simple, stable and reliable, which can help enterprises improve production efficiency and reduce labor intensity. It is the first choice for improving packaging grades.

## ➤ Machine Parts Callout

## ➤ Main Technical Parameter

|              |                         |
|--------------|-------------------------|
| Frequency    | 20kHz                   |
| Power        | 1800W                   |
| Power Supply | AC220V/110V 1PH 50/60Hz |
| Sealing Dia. | 10-50mm                 |
| Tube Height  | 50-210mm                |
| Capacity     | 10-15 pcs/min           |
| Air Pressure | 0.6MPa                  |
| Dimension    | L850*W600*730mm         |
| N.W          | 85kgs                   |

## ➤ Main Parts Details

|   |                      |                      |   |                       |                      |
|---|----------------------|----------------------|---|-----------------------|----------------------|
| 1 | PLC/Touch Screen     | Coolmay, CN          | 2 | Electric Relay        | Omron, Japan         |
| 3 | Air Cylinder         | AirTAC, China Taiwan | 4 | Sensory Switch        | SICK, Germany        |
| 5 | Stepper Motor        | JMC, CN              | 6 | Electromagnetic Valve | AirTAC, China Taiwan |
| 7 | Air Source Processor | AirTAC, China Taiwan | 8 |                       |                      |
