

Vertical tin can sealing machine for food package

Product description

This vertical food canning machine, tin can sealing machine is with high efficiency for sealing the round tin cans. Suitable for sealing all kinds of circular iron cans, paper can, iron steel cans, PET plastic cans, glass cans and so on. Quality is reliable, tank mouth ruffled uniform no folds, no leakage. Easy Operation and light weight, use the lighting power, a person can complete the operation. Compared with the traditional manual sealing machine, the electric sealing machine can greatly improve the efficiency of sealing, reduce the labor intensity of workers, and reduce the bad products caused by human factors, and it is an ideal equipment for food and beverage industry.

Technical Parameter:

Model	DFJ160
Voltage	AC 220v /50 hz or 110v / 60 hz
Power	0.55 kw
Can height	40-200 mm(can customize if bigger size)
Can diameter	35-150 mm
Capacity	10-24 bottles/min
Machine size	450*550*1350 mm
Weight	130 kg
Price	1150usd
Shipping cost	65usd

Note: One machine match with one mould (machine include a set of mould for one size) ,If you need different size, can be customized the mold. if your can size are not in standard space, need customized.
