

Granule packing machine

* Product discription

The granule animal feed packing machine is used to snack food, hardware, salt, MSG, chicken essence, seeds, rice, pesticide, fertilizer rice, veterinary medicine, feed premix, additives, and other granular quantitative packaging materials.

1, High precision digital sensors, so the granule animal feed packing machine can realize precise metering soon;

2, The keyboard packing machine , easy to operate, more reliable;

3, Speed vibrates the feeding automatic revision error, so granule animal feed packing machine realize high precision for packing;

4, This system granule animal feed packing machine has both two weigher, work alternately, fast packaging;

5, The part touching with the material of granule animal feed packing machine adopts the high quality stainless steel, corrosion dustproof ,easy to clean;

6, Strong compatibility, the granule animal feed packing machine is easy to match with packing equipments ;

Weigher	2
Model No.	KPDC-B2
Packing specification:	1000-2000gram
Packing speed:	800-1500bags/hour
Accuracy grade:	1.0
Power and volt:	AC220V 50Hz 500W
Total weight:	190kg
Overall size:	600*600*1850mm
Packing container:	Plastic bags, fabric bags, paper bags, wide-mouth bottles, etc.

Granule elevator machine

*Products description:

1. The hopper type bucket elevator for granule can send many kinds granule materials, the hopper volume and the screw are stainless steel .
2. Amplitude of vibration can be changed.
3. The bucket elevator for granule is automatic operating for feeding .
4. The bucket elevator for granule matches with granule packing machine .
5. This model bucket elevator for granule is easy to clear.
