

Automation cans sealing machines

Model	KP-100
Type	Automation
Power	380V/60HZ 550V
Suitable can height	50-200mm
Sealing speed	600-1800cans/h(depend on worker's efficiency)
Suitable can diameter	40-200mm
Size	1700(L)*1400(W)*1800(H)mm
Weight	450kg
Feature	Sealing in high quality, simple and compact structure, easy operation and maintenance, small volume, light, low noise
Application	It suitable for sealing aluminum can, matal can, PET can, paper can with easy open lid
Advantage	1. Changing a few parts for different sizes of cans. 2. It is ideal for small and medium food or drink corporation. 3. Lid joint control device: When the body into the tank when the lid was allocated accordingly, no tank no lid, overload or lack of cover Will tell you. 4. Production capacity step less, button operation, adjustment and easy maintenance. 5. High production capacity, high degree of automation, suitable for sealing production line equipment.
