

## Automatic Film Wrapping Machine

### Description:

The stretching function of the fresh-keeping film can reduce the wrinkle of the fresh-keeping film and increase the diaphaneity of the surface so as to make the merchandise look fresh and attractive, and reduce the use cost of the fresh-keeping film. The replacement of fresh-keeping film is very simple. It ensures that the operators can successfully finish the replacement of fresh-keeping film in a short time and reduce the operation time. The design is designed to reduce the floor area.

### Technical Parameter:

|                   |                        |
|-------------------|------------------------|
| Power:            | 1.35 (Kw)              |
| Voltage:          | 220V/380v              |
| Production speed: | 15-18 pcs/min          |
| Min product size: | 140*100*20 mm          |
| Max product size: | 300*210*30 (mm)        |
| Film width:       | 300-450 (mm)           |
| Dimension:        | 1410L*1100W*1300H (mm) |
| Weight:           | 300 (kg)               |
